# WHAT WE OFFER

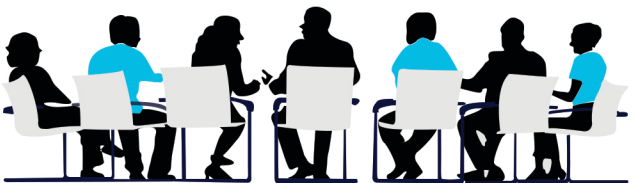

US2 offers a variety of services to improve energy efficiency and reduce costs. Whether it's general construction or retrofits to existing infrastructure, our turnkey approach will provide the solutions you're looking for.

Founded in 2005, US2 is dedicated to reducing energy consumption for our clients through innovative and intelligent solutions. We build close working relationships with our clients to improve existing infrastructure. Once implemented, our energy efficient strategies provide significant payback.

## SOLUTIONBASED SERVICES

Retired Air Force Col. David Shutler founded US2 based on an idea of trust. We develop open lines of communication with our clients to resolve problems before they happen. It's what we've come to call "the official conversation." This is when US2 comes together with the client to examine the issue and make them aware of new technologies that are currently available but not widely known. We've found this approach leads to mutual success for all parties. Additionally, our classification as an 8(a)-SDB enterprise offers our clients easy acquisition channels and helps the satisfy federal mandates. Through sole source agreements we can rapidly fulfill contract work.
